

# MD HASIBUL HASAN SHANTO

IT Operations & Network Engineer | Cloud & DevOps

+61 468 910 545 • shantoaussie097@gmail.com • Parramatta, NSW • [LinkedIn](#) • GitHub: ShantoI TE01

## PROFESSIONAL PROFILE

Results-driven IT Operations & Network Engineer with 3+ years of experience in telecom network operations, system reliability, and infrastructure support. Strong foundation in Cisco networking, Linux administration, and cloud-native solutions, including AWS, Docker, and Kubernetes. Currently pursuing a Master of IT at Charles Darwin University, with hands-on DevOps and CI/CD experience gained through real-world projects.

## TECHNICAL SKILLS

|                   |                                                                        |
|-------------------|------------------------------------------------------------------------|
| Networking        | TCP/IP, DNS, DHCP, SSH, VLANs, Routing & Switching                     |
| Network Security  | Firewalls, VPNs, IDS/IPS, Access Control, Secure Network Configuration |
| Cloud Platforms   | AWS (EC2, S3, IAM, VPC, RDS, Lambda, CloudFormation, CloudWatch)       |
| DevOps & CI/CD    | Git, Jenkins, GitLab CI, Terraform (IaC), Docker, Kubernetes           |
| Monitoring        | Grafana, Prometheus, UMS, Atlas                                        |
| Telecom           | Nokia, ZTE, Huawei (2G/3G/4G)                                          |
| Operating Systems | Linux (Ubuntu, AlmaLinux, CentOS), Windows                             |
| Programming       | Python, SQL, Bash                                                      |

## PROFESSIONAL EXPERIENCE

### Network L1 IT Support (Intern) – OCCOM Pty Ltd, North Sydney, NSW

Mar 2026 – Present

- Configure and deliver customer routers; perform hardware and software installation for residential and business clients.
- Conduct on-site network troubleshooting and pre-installation assessments to ensure 99%+ service readiness.
- Maintain compliance with telecom laws, codes of practice, and privacy regulations.
- Produce ISP price reports, router configuration guides, and technical forum documentation.

### IT Support & Marketing Intern – ACIC (Australian College Information Centre), Australia

Aug 2025 – Sep 2025

- Troubleshoot technical issues, installed software, and maintained internal IT systems for staff and students.
- Prepared academic-style technical reports to support IT projects and student engagement initiatives.
- Completed leadership and job-readiness training focused on Australian workplace culture. Received the Best Intern Award.

### IT Operations Engineer – L1 & L2 (NOC) – Banglalink, Bangladesh

Aug 2021 – Feb 2024

- Provided L1/L2 network support, troubleshooting cellular site downtime, zero-traffic incidents, clock alarms, and hardware faults — achieving 25% faster incident resolution.
- Performed network configuration updates, fault analysis, alarm management, and parameter optimisation to maintain network SLAs.
- Monitored MSC, BSC, TX, and BTS network elements, coordinating with vendors and cross-functional teams to restore services and reduce outage duration.
- Documented infrastructure changes, system upgrades, and troubleshooting procedures to improve the team's knowledge base.

### Technology Intern (Remote) – Bright Network, Remote

Dec 2020 – Jan 2021

- Resolved 95% of network, hardware, and software incidents within SLA, providing technical support across installation, configuration, and maintenance.
- Maintained IT documentation, SOPs, and troubleshooting guides, contributing to a 20% reduction in repeat downtime incidents.

## EDUCATION

### Master of Information Technology (Information Systems)

July 2024 – May 2026 (Expected)

[Charles Darwin University](#)

Relevant coursework: Networking & Security, Cloud Architecture, Data Science, IT Service Management, Information Systems Practice.

### BSc in Electrical & Electronic Engineering

2016 – 2021

[AhsanUllah University of Science & Technology](#)

Relevant coursework: Digital Communication, Wireless Networks, Data & Computer Networks, Embedded Systems.

## CERTIFICATIONS & TRAINING

---

- Cisco Certified Network Associate (CCNA) – CSL Training
- Red Hat Certified System Administrator (RHCSA) – UIU & Red Hat
- Certified Network Security Specialist (CNSS) – ICSI
- ITIL 4 Fundamentals – Alison
- 100 Days of DevOps – KodeKloud (Hands-on Labs)
- Python (Basic) – HackerRank | Introduction to Linux – TAFE NSW

## KEY PROJECTS

---

### Mental Health Chatbot – AI Thesis Project

2025

Developing an NLP-driven chatbot to provide conversational mental health support, with full academic documentation covering methodology, ethics, and evaluation.

### AI Toolkit for Small Australian Farms – University Project

2025

Designed an AI-based toolkit for crop monitoring, weather prediction, and resource optimisation; presented findings at SXSW Sydney 2025 Innovation Festival as part of CDU's showcase.

### Docker-Based Monitoring Stack – Personal Project

Deployed Node Exporter in Docker, configured Prometheus for metrics scraping, and built Grafana dashboards for real-time system visibility. Stack: Docker, Prometheus, Grafana.

### Automated Backups with Python – Personal Project

Wrote Python scripts to automate backup workflows, improving data security and reducing manual operations effort.

### Umbrella Monitoring System (UMS) – Banglalink

Integrated fault and performance management across IT, VAS, and BSS systems, monitoring alerts for all network nodes (Radio, Core, IT) and enhancing network reliability through automated alert management.

## PUBLICATIONS

---

### Improving Early Alzheimer's Disease Diagnosis Using Machine Learning

2025

Accepted – IDAA 2025 Conference, published under Atlantis Press (Springer Nature). Research focuses on ML-based diagnostic frameworks for the early detection of Alzheimer's disease.

### Automated Lemon Leaf Disease Detection with CNN for Smart Agriculture

2025

Accepted – 28th IEEE ICCIT 2025 Conference. CNN-based model for automated crop disease detection, contributing to AI-driven smart farming.

## ACHIEVEMENTS & ACTIVITIES

---

- IARE Certificate of Excellence – Winner of the Monthly Research Challenge 'Mental Health Matters' (Dec 2025), for research on 'Predictive AI for Mental Health Equity: A Proactive Framework for Student Well-Being in Higher Education'.
- SXSW Sydney 2025 – Presented 'Agrimate' AI farming innovation, selected by Charles Darwin University for the SXSW Innovation Festival showcase.
- Best Intern Award – ACIC (Australian College Information Centre)
- Student Council Member – Charles Darwin University
